Dilip Venkatesh

Principal Engineer

Phone: +1 215-760-5959 | E-mail: dilip.venkatesh@outlook.com

Summary:

Principal Engineer with 15+ years of experience in enterprise software architecture and cloud security. Architect of industry-first platforms serving millions of users, contributing to $100M+ in ARR. Architected MCP V2 and rebuilt Atlassian's official Remote Model Context Protocol (MCP) server, scaling from 40 to 300+ tools across 10+ Atlassian products at 20M tool calls/day (majority enterprise), establishing new standards for AI-to-enterprise integration. Expert in scaling security, authentication, and data infrastructure to handle 1 billion+ events daily.

Work Experience:

Atlassian | Principal Engineer

May 2020 – Present (5+ years)

- **MCP Platform Architect:** Architected MCP V2 and rewrote Atlassian's official Remote MCP server, scaling from 40 to 300+ tools across 10+ Atlassian products at 20M tool calls/day (majority enterprise); achieved General Availability in January 2026, establishing MCP as the agentic surface for Atlassian products.
- Led critical initiatives as a part of Cloud Security making Atlassian cloud enterprise ready.
- Spearheaded efforts in authentication, data security, DLP, API security, OAuth, and scopes, building a scalable security platform working across various Atlassian products with millions of users.
- **Architected a new premium offering for data security (Guard Premium)**, significantly enhancing Atlassian's security posture and market offering.
- **Helped grow Atlassian Guard business from a few million to over $100+ million ARR**, demonstrating strong impact on business growth and product strategy.
- Engineered and implemented solutions for **scaling audit logs to handle over 1 billion events per day**, ensuring high performance and reliability for critical security data.

SAP Labs, Palo Alto | Software Architect

September 2016 – April 2020 (3 years 8 months)

- Contributed to the architecture, modeling, and development of C/4 HANA Service Cloud ticketing, including Authorization (ACL), Approval, and workflow.
- Designed and developed reusable Micro-Services on Cloud Foundry and integrated Cloud workflow with Kyma.
- Provided solution architecture, team leadership, and performance expertise for various customers (e.g., Apple, Under Armor, Nike).

SAP Labs India | Senior Engineer

July 2010 – August 2016 (6 years 2 months)

- Involved in the design, development, and architecture of S4 Manufacturing within SAP Fashion Management. (built a 0 to 1 product, with millions of $ in customer deals - Under Armor, Nike, Armani, Luxottica etc..)
- Co-innovated and implemented a key planning tool (Feasibility Analysis) with Giorgio Armani S.p.A. reducing the raw material waste by 40% (which is the costliest in their BoM)
- Developed the KPI calculation engine for Process Observer to aid in SLA tracking (Process mining).

- Optimized 100s reporting tools for enhanced performance on the HANA DB during the mega migration of SAP to HANA DB.

Education:

- Bachelor’s in Computer Science

Core Competencies

- **Scalable Distributed Systems** – Event-driven and microservices architecture.
- **Security & Authentication** – OAuth2, SAML, RBAC, MFA, PGP Encryption, IAM, SSO, API security
- **Operational Excellence** – API productionisation, automation, CI/CD, observability.
- **APIs & Microservices:** RESTful APIs, OpenAPI, Webhooks, gRPC
- **Product Strategy,** Zero-to-One Product Development, Team Mentoring, Enterprise Scaling
